# Rajesh Exports (RJEX_IN) 

Earnings Update Report
Consumer Discretionary: Gold Jewelry Manufacturer

## Q2FY2020 [ended September] Earnings Update

## Robust Growth in Revenues YoY and QoQ

Rajesh Exports reported a stellar increase in revenues on a sequential QoQ and YoY basis while net profit growth was flat on YoY basis and in positive single digits on a sequential QoQ basis for the second quarter ended September 2019. Revenues for the second quarter came in at Rs. 668 bn, up $25 \%$ YoY and $65 \%$ on a sequential QoQ basis. Revenue growth has shown sharp jump on a YoY and QoQ basis despite a slowdown in demand for gold in developed and emerging market economies, indicating sustained recovery since the beginning of the current financial year. Robust revenue growth indicates that demand continues to be strong with the strategy to focus on the sale of high margin products by the company. For the second quarter, EPS increased by $4.5 \%$ to Rs. 10.69 vs. Rs. 10.23 in Q1 FY2020, while net profit also increased by $4.5 \%$ from Rs. 3 bn in Q1 FY2020 to Rs. 3.2 bn in Q2 FY2020. The net profit growth was relatively subdued as compared to revenue growth due to an increase in raw material costs as a percentage of sales leading to decline in gross margins on a YoY and QoQ basis. Our conversations with CEO Rajesh Mehta suggest the company is on track to post sustained growth YoY and QoQ in both revenue and EPS for the current fiscal year ending $03 / 2020$.

The absolute reduction in finance costs to nil as compared to Rs. 1 bn in Q2 FY2019 was the primary reason for 5\% increase in profitability despite a decline in gross margins on a YoY basis. As a reminder, Rajesh Exports remains a zero debt company. The finance costs were reported as zero on account of an adjustment of the interest cost in the COGS.

Within Rajesh Export's home market in India, while reported official GDP growth has been robust [albeit slowing] at around 5\%, unemployment remains at high levels, and the demand for luxury goods in particular, such as cars [both mass market as well as high-end], apartments and real estate, and gold/jewelry has all been subdued. Many of these markets haven't really recovered from the Indian government's demonetization and GST [goods and services tax] implementation a few years back. With a positive election outcome in May 2019, there is hope that demand would witness sustained recovery in India going forward, particularly during the ongoing festive and wedding seasons. During our conversations with management, they mentioned to us that the
company is seeing strong demand for its higher margin value-added products and they expect robust sales growth going forward.

We maintain our FY2020 earnings forecast to Rs. 49.32 per share, a growth of $13 \%$ over the FY2019 earnings. The USA end market remains robust with strong consumer spending accompanying record low unemployment, while Europe has shown an uptick as evidenced by the export orders executed by the company in Q2 FY2020.

The company's gross profit margin contracted to $0.7 \%$ in Q2 FY2020 from $1.07 \%$ in Q1 FY2020 and $1.06 \%$ in Q2 FY2019. The operating profit margin also contracted to $0.5 \%$ in Q2 FY2020 from $0.85 \%$ in Q1 FY2020 and $0.8 \%$ in Q2 FY2019. We believe most of this contraction is simply due to short-term working capital related finance costs [the company has no net debt] now being classified as COGS, rather than the prior classification as interest expense. The company continues to focus on the sales of higher margin products which are expected to enhance profitability for the company going forward. So we believe both gross and operating margins should gradually increase from today's level.

## Maintain Estimates and Price Target Rs. 900; 27\% Upside

We maintain our FY2020 earnings estimates of Rs. 49.32 per share on account of a continued growth in revenues and an increase in profitability. We maintain our one-year price target of Rs. 900 on the stock. Our price target represents an upside of approximately $27 \%$ from the current levels. Our 12month price target on the stock is based on DCF methodology and backed by traditional P/E multiples as well. Please see detailed earnings and valuation model attached.

Rajesh Exports is the world's largest refiner of gold and largest exporter of gold jewelry with a $40 \%$ market share in India. With over 30 years of operating history, the company is a low cost manufacturer due to economies of scale, and it derives $90 \%$ of its revenues from exports. The company is rapidly expanding in retail stores in India as well with 82 stores presently. The company is a prime beneficiary of secular growth in Indian and Asian gold and jewelry demand. Over the last five years, the company has recorded a CAGR of $29 \%$ in EPS and $44 \%$ in revenues.

Our DCF-based price is Rs. 871 which assumes a $13 \%$ WACC and a $3 \%$ terminal growth rate. Our price target implies a P/E multiple of 18x on our FY03/2020 EPS estimate of Rs. 49.32, and a P/E of 17x on our forward FY03/2021 estimate of Rs. 52.00. We continue to remain positive on the margin growth story based on the company's strong execution seen over the last 18 months. While the company operates at a low level absolute of operating margins, a relatively small increase in margins can be highly accretive to the EPS.

Currently, the stock is trading at a P/E multiple of just 14x on our FY03/2020 EPS estimate, and a P/E of 13x on our forward FY03/2021 estimate, which is at a significant discount to its 5 -year average $\mathrm{P} / \mathrm{E}$ of 16 x , as well as the overall

Indian stock market where the benchmark NIFTY Index is trading at a trailing $25 x$ P/E level.

Also, the stock is trading at a Price/Sales ratio of just 0.11 on our FY03/2020 revenue estimate and a P/S of 0.10 x on our forward FY03/2021 estimate, which is at a significant discount to the trailing P/S ratio of 2.0 x for the NIFTY Index.

## Order Book Increases by $\mathbf{1 6 \%}$ QoQ to Rs. 534 bn

At the end of the second quarter ended September, the order book swelled by Rs. 72 bn to Rs. 534 bn from Rs. 462 bn at the end of the first quarter ended June. The rise in order book by $16 \%$ on a sequential QoQ basis indicates growth in revenues will sustain in the coming quarters. The company also expects to receive significant orders for their range of jewelry from international markets.

The Company will be executing orders from its own manufacturing facility, which is the world's largest jewelry manufacturing facility. This facility has a processing capacity of 250 tons of jewelry and gold products per annum. Company is confident of executing its orders well within the time frame on the back of its expertise, skilled craftsmen, artisans \& its exceptionally strong backward integrated infrastructure.

The company had introduced new designs in the international markets which constitute a new range of jewelry. The company expects further significant orders for this range of jewelry from the international markets.

In April 2019 Rajesh Exports had opened its $82^{\text {nd }}$ retail showroom under its brand SHUBH JEWELLERS at Mangalore. With this launch the company now has 82 Shubh Jewellers showrooms. The company is aggressively planning to launch more Shubh Jewellers showrooms in the coming months.

## Bangalore Refinery Starting in 3 months

During our conversations with management, they mentioned to us that the company is currently in the final stages of setting up its gold refining facility in Bangalore and that the facility should be operational in the next 3 months. The products developed at this facility will be used for the company's export business as well as for its domestic business in India. The refinery is expected to contribute an additional $5 \%$ to $8 \%$ of the existing revenues when it reaches full production. It is expected to reach $100 \%$ capacity utilization after one year from the start of commercial production.

The refinery will help the company to further integrate its refining, manufacturing and export and retail operations. At the end of the second quarter, the company's order book stood at Rs. 534 bn. The company continues to operate 82 retail jewelry stores in Karnataka under its brand name Shubh. The company currently is the largest gold refiner in the world, refining over $35 \%$ of the world's gold at its facilities located in India and Switzerland. It has a capacity to refine 2,400 tons of gold per annum.

## Gold Demand takes a Hit in India

Demand for gold in India saw a 32\% decline on a year on year basis in volumes to 124 tons from 183 tons in the second quarter of 2019-20. Data from the World Gold Council indicated that the value demand for gold declined by $17 \%$ to Rs. 338.5 bn in the second quarter of FY2019-20 from Rs. 40.6 bn while investment demand fell by $35 \%$ compared to the same period last year. However, there has been an increase of 59\% in recycled gold during the second quarter of FY2019-20 to approximately 37 tons from 23 tons in 2018.

The ruling BJP government in the recently announced government budget [July 2019] hiked the import duty of gold from $10 \%$ to $12.5 \%$. The increase in the import duty on gold has begun to dampen imports for the gold and jewelry industry in India.

India is one of the largest gold importers in the world, and the imports mainly take care of demand from the jewelry industry. The All India Gem and Jewellery Domestic Council has urged the government to roll back the hike in gold import duty from $12.5 \%$ to $10 \%$, and implement a comprehensive integrated "gold policy" to help boost the gem and jewelry industry. The import duty hike of $2.5 \%$ to $12.5 \%$ has made gold jewelry costlier and has impacted consumer sentiment leading to postponements of fresh purchases. The import duty on gold was levied to curb the Current Account Deficit (CAD) which has narrowed to $2.0 \%$ of GDP in the first quarter ended June 2019 from $2.3 \%$ of GDP in last year same quarter primarily on account of higher invisible receipts.

According to the World Gold Council Global demand for gold rose 3\% year on year to 1,108 tons in the second quarter of FY2019-20 and jewelery demand was a down $16 \%$ to 461 tons, mainly due to weak consumer sentiment. Weak consumer sentiment was due to continued geopolitical and economic uncertainty, coupled with substantially higher gold prices, dented jewelery purchases in all major markets.

## Disclaimer

Evaluate Research provides institutional equity research on global public midcap companies. All information used in the publication of this report has been compiled from publicly available sources that are believed to be reliable; and we do not seek insider information for writing this report. Opinions, estimates and projections in this report constitute the current judgment of the analyst(s) as on the date of this report. It is not guaranteed as to accuracy, nor is it a complete statement, of the financial products, securities, or markets referred to. Opinions are subject to change without notice. To the extent permitted by law, Evaluate does not accept any liability arising from the use of information in this report.

This document is provided for information purposes only, and is not a solicitation or inducement to buy, sell, subscribe, or underwrite securities or units. Evaluate does not make individually tailored investment recommendations. Any valuation given in a research note is the theoretical result of a study of a range of possible outcomes, and not a forecast of a likely share price. The securities, issuances or investment strategies discussed in this report may not be suitable for all investors. Investments involve many risk and potential loss of capital. Past performance is not necessarily indicative of future results. Evaluate may publish further update notes on these securities/companies but has no scheduled commitment and may cease to follow these securities/companies as may be decided by the research management.

The companies or funds covered in this research may pay us a fee in order for this research to be made available. Any fees are paid upfront without recourse. Evaluate and its analysts are free to issue any opinion on the security or issuance. Evaluate seeks to comply with the CFA Institute Standards as well as NIRI Guidelines (National Investor Relations Institute, USA) for all conduct, research and dissemination of research, particularly governing independence in issuer commissioned research.

Forward-looking information or statements in this report contain information that is based on assumptions, forecasts and estimates of future results, and therefore involve known and unknown risks or uncertainties which may cause the actual results, performance or achievements of their subject matter to be materially different from the current expectations.

Evaluate makes an effort to use reliable, comprehensive information, but makes no representation that this information is accurate or complete. Evaluate is under no obligation to update or keep current the information contained herein. The compensation of the analyst who prepares any Evaluate research report is determined exclusively by Evaluate's research and senior management.

Evaluate Research Ltd. does not conduct any investment banking, stock brokerage or money management business and accordingly does not itself hold any positions in the securities mentioned in this report. However, Evaluate's directors, affiliates, and employees may have a position in any or related securities mentioned in this report at an appropriate time period after the report has already been disseminated, and in compliance with all CFA Institute Standards.

No part of this report may be reproduced or published without the prior written consent from Evaluate Research Ltd. Please cite the source when quoting.
